INTEGRABLE SYSTEMS IN THE REALM OF ALGEBRAIC GEOMETRY

Springer Jul 2001, 2001. Taschenbuch. Book Condition: Neu. 23.5x15.5x cm. This item is printed on demand - Print on Demand Neuware - This book treats the general theory of Poisson structures and integrable systems on affine varieties in a systematic way. Special attention is drawn to algebraic completely integrable systems. Several integrable systems are constructed and studied in detail and a few applications of integrable systems to algebraic geometry are worked out. In the second edition some of the concepts in Poisson geometry are clarified by introducing Poisson cohomology; the Mumford systems are constructed from the algebra of pseudo-differential operators, which clarifies their origin; a new explanation of the multi Hamiltonian structure of the Mumford systems is given by using the loop algebra of $sl(2)$; and finally Geodesic flow on $SO(4)$ is added to illustrate the linearization algorithm and to give another application of integrable systems to algebraic geometry. 264 pp. Englisch.
