DEFENSE GENES IN TOMATO

Nova Science Publishers Inc. Paperback. Book Condition: new. BRAND NEW, Defense Genes in Tomato, Christian Danve M. Castroverde, Ross N. Nazar, Jane Robb, Plant defence against disease-causing organisms usually follows three steps: pathogen recognition, signal transduction and the resistance response. In tomatoes (*Solanum lycopersicum*), a myriad of R-genes provide resistance against viruses, bacteria, fungi and insects that counterattack with their corresponding avirulence or avr genes. R-genes have been characterised over the years and classified into four classes: TNA, CNA, RAP/RAK and miscellaneous. This book reviews these different defense genes and the recent advances associated with them.
