

## Oeuvres Completes Panegyriques (9)

Filesize: 7.89 MB

### ***Reviews***

*This publication might be well worth a read, and much better than other. It really is simplified but excitement inside the 50 % of the book. You will not feel monotony at whenever you want of the time (that's what catalogues are for concerning when you check with me).  
(Imogene Bergstrom)*

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 46 pages. Original publisher: Reston, Va. : U. S. Dept. of the Interior, U. S. Geological Survey, 2007. OCLC Number: (OCoLC)123900684 Subject: Floods -- Alaska -- Juneau. Excerpt: . . . Methods of Analysis on Water Data, 1982 ). PEAKFQ facilitated computation of on Water Data, 1982 ). The Duck and Jordan Creek gaging station-data-based peak-streamflow magnitudes for Duck stations have short periods of record that should statistically and Jordan Creeks. Systematic peak-streamflow records are benefit from incorporating regional hydrology. The regional available for the USGS gaging station on Duck Creek from equations for southeast Alaska correlate peak streamflows to 1994-2004 ( 11 years of record ) and on Jordan Creek from the basin characteristics drainage area, area of lakes and ponds 1998-2005 ( 8 years of record ) ( table 1 ). PEAKFQ identified ( storage ), mean annual precipitation, and mean minimum the water year 2000 peak streamflow for Duck Creek as January temperature ( Curran and others, 2003 ). Drainage a high outlier, but no historic period could be determined area boundaries drawn on paper USGS topographic maps so the frequency distribution was not adjusted. The 1996 and digitized provided a digital determination of drainage historic peak for Jordan Creek was omitted from analysis area. Summing the areas of lake and pond polygons on digital because it was less than several systematic peaks ( table 1 ). hydrography coverages available at <http://agdc.usgs.gov> data The generalized skew coefficient and standard error of the usgs togeo. html and dividing by drainage area produced the generalized skew for Streamflow Analysis Region 1 ( Curran percentage of lakes and ponds. Mean annual precipitation and others, 2003 ) were used for the PEAKFQ analysis. Peak-was computed from...
